Cross-Contact

All our beverages are hand crafted uniquely for you. Due to the nature of how we create our beverages we cannot guarantee that they are free from any allergens. Our beverages are prepared where allergens are handled by our partners, and where equipment and utensils are used for multiple menu items, including those containing allergens. If you do not see a product in this booklet, please always ask the barista, so they can advise accordingly.

Ingredient information within this booklet is based on standard product formulations, variations may occur. Please note some menu items may not be available in all stores.

This information is updated regularly to reflect our procedures instore.

Please check www.starbucks.co.uk for the most up to date information.

Customising your handcrafted beverage

This guide can be used to understand the nutrition and allergen information for your finished beverages, including information for any customisations such as syrups, drizzles, whipped cream, sprinkles and cream cold foams.

Did you know?

Any of our coffee-based beverages can be customised with a different bean, based on your preference.

Bean Types

Signature Espresso is our standard bean type that is used to craft almost all our coffee-based beverages. It is a dark and more intense, full-bodied roast.

Starbucks Blonde® is incredibly smooth and subtly sweet, with a creamy mouthfeel.

Decaf Espresso uses our standard signature espresso bean in a decaffeinated form.
